General Product Description
The most popular abrasion-resistant steel with excellent structural properties. Hardox 450 is an abrasion-resistant steel with a nominal hardness of 450 HBW. Hardox 450 combines good bendability and weldability with an option for guaranteed impact toughness (Hardox 450 Tuf).

The products can be used in many different components and structures that are subject to wear. Hardox 450, with an extra 50 Brinell hardness over our 400 grade, provides better dent and abrasion resistance as well as longer wear life, so you can achieve even greater savings.

Dimension Range
Hardox 450 Sheet is available in thicknesses between 2.5 - 8 mm. Hardox 450 Sheet is available in widths up to 1650 mm and lengths up to 16000 mm. More detailed information on dimensions is provided in the dimension program.

Mechanical Properties

<table>
<thead>
<tr>
<th>Thickness (mm)</th>
<th>Hardness(^1) (HBW)</th>
<th>Typical yield strength (MPa), not guaranteed</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.50 - 8.00</td>
<td>425 - 475</td>
<td>1100 - 1300</td>
</tr>
</tbody>
</table>

\(^1\) Brinell hardness, HBW, according to EN ISO 6506-1, on a milled surface 0.5 – 3 mm below surface. At least one test specimen per heat and 40 tons.

Impact Properties

<table>
<thead>
<tr>
<th>Grade</th>
<th>Longitudinal test, typical impact energy, Charpy V 10x10 mm test specimen.</th>
<th>Transverse test, guaranteed impact energy, Charpy V 10x10 mm test specimen.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hardox 450</td>
<td>50 J / -40 °C</td>
<td>-</td>
</tr>
<tr>
<td>Hardox 450 Tuf  (^2)</td>
<td>Min. 27 J / -20 °C</td>
<td></td>
</tr>
</tbody>
</table>

\(^1\) Impact testing is performed on thicknesses ≥ 6 mm. For thicknesses between 6 - 11.9 mm, sub-size Charpy V-specimens are used. The specified minimum value is then proportional to the cross-sectional area of the test specimen, compared to a full-size specimen (10 x 10 mm). Impact testing according to ISO EN 148 per heat and thickness group. Average of three tests.

\(^2\) Single value minimum 70% of specified average.

Chemical Composition (heat analysis)

<table>
<thead>
<tr>
<th>C(^0) (max %)</th>
<th>Si(^0) (max %)</th>
<th>Mn(^1) (max %)</th>
<th>P (max %)</th>
<th>S (max %)</th>
<th>Cr(^1) (max %)</th>
<th>Ni(^1) (max %)</th>
<th>Mo(^3) (max %)</th>
<th>B(^1) (max %)</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.23</td>
<td>0.50</td>
<td>1.60</td>
<td>0.025</td>
<td>0.010</td>
<td>1.20</td>
<td>0.25</td>
<td>0.25</td>
<td>0.005</td>
</tr>
</tbody>
</table>

The steel is grain refined. \(^0\) Intentional alloying elements.

Carbon Equivalent CET(CEV)

<table>
<thead>
<tr>
<th>Thickness (mm)</th>
<th>2.50 - 8.00</th>
</tr>
</thead>
<tbody>
<tr>
<td>Max CET(CEV)</td>
<td>0.39 (0.49)</td>
</tr>
<tr>
<td>Typ CET(CEV)</td>
<td>0.33 (0.45)</td>
</tr>
</tbody>
</table>

\[ \text{CET} = C + \frac{Mn + Mo}{10} + \frac{Cr + Cu}{20} + \frac{Ni}{40} \]

\[ \text{CEV} = C + \frac{Mn}{6} + \frac{Cr + Mo + V}{5} + \frac{Cu + Ni}{15} \]

Tolerances

Thickness
Tolerances according to Hardox Thickness Guarantees. Hardox\textsuperscript{®} Guarantees meets the requirements of ½ EN 10 051 for cut to length sheet.
Length and Width
According to SSAB's dimension program. Tolerances conform to EN 10 051. Tighter tolerances available on request.

Shape
Tolerances according to EN 10 051.

Flatness
For cut to length sheet the tolerances are according to Hardox Flatness Guarantees Class B, that offers narrower tolerances compared to EN 10 051.

Surface Properties
According to EN 10 163-2, Class A Subclass 1.

Bending
Tolerances for Hardox cut to length sheet are according to Hardox Bending Guarantees Class B. All Classes are closer than the requirements in EN 10 025-6.

Delivery Conditions
The delivery condition is Q (Quenched). Cut to length sheet are delivered with an as-rolled surface and mill edges as standard delivery condition. Delivery requirements can be found in SSAB’s brochure 41-General Product Information Strenx, Hardox, Armox and Toolox-UK or at www.ssab.com.

Fabrication and Other Recommendations
Welding, bending and machining.
Recommendations can be found in SSAB’s brochures at www.hardox.com or consult Tech Support, techsupport@ssab.com.

Hardox 450 and Hardox 450 Tuf are not intended for further heat treatment. Mechanical properties are achieved by quenching and when necessary by means of subsequent tempering. The properties of the delivery condition cannot be retained after exposure to temperatures in excess of 250 °C. Hardox sheets can be welded and thermal cut at room temperature without pre-heating, all common welding and cutting processes can be used.

Appropriate health and safety precautions must be taken when welding, cutting, grinding or otherwise working on this product. Grinding, especially of primer coated plates, may produce dust with a high particle concentration.
